RE: County File No.DRC 2011-00013

Dear Kerry:

For the record, please find enclosed petitions with 1,092 signatures gathered in the Los Osos community regarding Audubon's Minor Use Permit/Coastal Development Permit application for development on East Sweet Springs Nature Preserve between Baywood Park and Cuesta by the Sea. These signatures were gathered between October 2011 and May of 2012 when the details of the application came to the attention of the community. The removal of mature eucalyptus trees has since been deleted from the application; however, it is my interpretation that the removal of other mature tree species and immature eucalyptus are still at risk of removal.

If this item is not already scheduled as a public hearing, I would like to request a hearing on this matter. Along with the permit requests, I understand that the Environmental Document prepared for the project will also be considered as part of the hearing, and I would like to receive a copy.

Please contact me if there are any changes or additional information regarding this item.

Sincerely,

Betty Winholtz
for SAVE THE PARK

We support the addition of native species to Sweet Springs East. At the same time we do not want any of the Eucalyptus trees removed. We want both habitats to work together because they both have their role in nature.

(PLEASE PRINT CLEARLY)
